INTERSTITIAL 700€ / Day

Interstitial, or entry page. An interstitial opens as a full-screen entry page when the visitor arrives at avecmedia.fi. Because an interstitial is scaled according to the terminal device, it can reach visitors regardless of the device used. **Repeated three times per day/visitor/browser**.

NATIVE ADVERTISING 2,900€*/NATIVE

Native advertising is content marketing that is seamlessly integrated into the media it shares a platform with. Native content is just as interesting, catchy and desirable as any other content and is created using journalistic approaches. The main thing is that content speaks to the desired target group in just the right way in the correctly chosen media and communicates the company message in an interesting way. It is also possible to embed a video at the end of the article. Ask more about Avecmedia's own video production! **Native advertising is published on a website like an article, accompanied by the word ADVERTISEMENT.**

*Price includes content producer's work.

VIDEO FILES

Videos start automatically on the consumer's screen without audio and end on the last frame, on which a "Read more" button and "Replay" icon are overlayed.

MATERIAL PREPARATION

Preparation of banners from customer material 100€ / hour.

LATE DELIVERY OF MATERIAL

If online material has not been delivered by the set deadline in the correct format or it is damaged/unusable or the content fails to meet the publishing requirements, Mediatalo Keskisuomalainen cannot guarantee that it will be possible to publish the advertisement by the desired date/time. If the online campaign material is delivered late, the delayed or unusable material may prevent the campaign from being launched by the desired date/time.

Our guidelines comply with the Internet advertising <u>standards</u> set by IAB Finland. Prices include the current VAT rate. The set kilobyte limits are unconditional and there is unfortunately no room for flexibility with them. Kilobyte limits cannot be avoided by using loaders or third-party tags. All material and any tracking pixels must be HTTPS-compatible.

ITEMS TO NOTE WITH HTML5 MATERIAL

Initial loading must be as small as possible and unnecessary requests should be avoided. Downloads after the initial loading should be avoided. If such downloads are necessary to the advertisement, polite loading may not exceed the kilobyte limit set for the initial loading. <u>Read more in the IAB guidelines for HTML5 material.</u>
